

Antibiotic-Resistant Bacteria

ARB including MRSA

Are you a carrier of a resistant bacteria?

In the last 2 months, have you:

- been treated in a foreign care institution?
- stayed in a Dutch care institution where MRSA / ARB prevailed?

- been a resident in a centre for refugees

In the past 2 months, have you had contact with pigs, veal calves or broiler chickens on livestock farms or are you living on a holding for pigs, veal calves or broiler chickens?

Are you a room-mate, partner or caretaker of an MRSA-positive person?

If so, please report this to the front desk of your practitioner's. You could be a carrier of a resistant bacterium. Help us keep the care sector safe!
